

MT3 Dental Electric Motor

Automatic water and air supply systems

Free to place, no need to install on the dental unit
Plug and play
Easier for clinical use

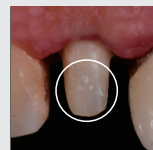

German bearing

More stable

More precise tooth preparation

Longer service life, lower vibration, more stable and precise cutting

Guarantee stable speed and torque output

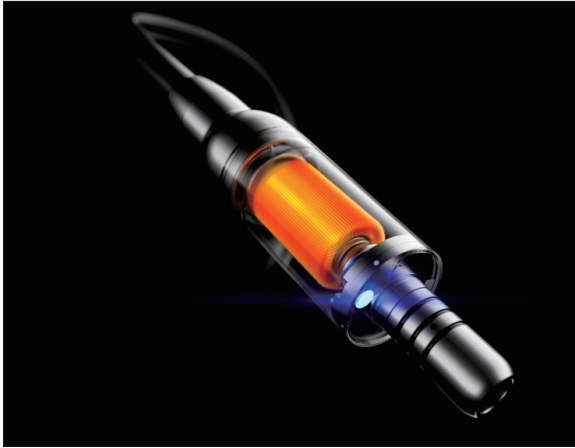

Preparation with
turbine handpiece
Rough surface with pits

Preparation with
electric handpiece
Smooth surface
without scratch

Minimally invasive restoration Precise tooth preparation

Compared with air-driven handpieces,
it features more stable output and larger clamping force to grasp the bur tighter.
Effectively improve the precision of polishing and tooth preparation.

High performance brushless motor

Higher torque, more powerful

More powerful crown-splitting

More efficient tooth separation and crown removal

Lower noise, micro-vibration.

10 times the service life of brush motor

Fewer aerosols

Four-hole water spray, stable output

Over 50% aerosols fewer than
air-driven handpieces

Guarantee safer treatment environment

4.5-inch LCD large screen

Large color touch screen
screen presents all functions
Handy to operate

Aut o sa ving One - touch c ontr ol

3 preset pr ograms

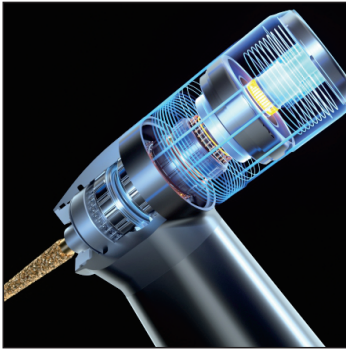

Aut o paramet er sa ving, one - touch func tion contr ol

Micro filtration system

Built-in micro filtration system
Prevent foreign objects from entering the waterway
Effectively reduce the probability of waterway blockage

Anti-heat

Anti-heat design
Prevent patients from burning for accidental touching of the cover
Ensure safer operation

Anti-suck -back design

Reduce cross infection
Prolong contra-angle service life
